

ZAKIY T. MANIGO

Forward Deployed Engineer

+1 (908) 230-6948 · zakiymanigo@gmail.com · [linkedin.com/in/zakiymanigo](https://www.linkedin.com/in/zakiymanigo)

Software engineer who embeds with a customer, maps the real operating loop, and ships production software that makes the product work there. Clinic, shop, and brand deployments — not demo sandboxes.

EXPERIENCE

BariAccess (TREI) — Software Engineer (one of two primary engineers)

Jul 2026 – Present · New York, NY / Remote

- Embedded with Bariatric Associates to build TREI, a GLP-1 and metabolic-care platform: patient site (trei.care), Expo iPhone app, React staff console, Fastify API, PostgreSQL, and a worker with a transactional outbox.
- Implemented the clinic path end to end — identity, preparation, consults, membership, staff admission, daily programs, wearable custody, and a fail-closed Azure OpenAI assistant (Aba) — and changed the product when office workflow disagreed with the first design.
- Integrated last-mile clinic systems on Azure staging: Entra / External ID, Key Vault, Service Bus, Stripe sandbox, Calendly scheduling races, and Spike wearable adapters. ~203 commits, ~99k lines added, 658 files touched; do not claim sole authorship of the platform.

LaunchPage Studios — Founding Engineer

Oct 2025 – Present · New York, NY / New Jersey

- Sat with Alex Road Service (Keasbey, NJ roadside / truck repair) and shipped their operating system: public site plus 20+ ops screens (work orders, estimates, invoices, inventory, schedule, RBAC, Stripe Checkout + webhooks + refunds). Live demo: launchpage-alex-roadservice.web.app.
- Wrote the post-sale delivery playbook — intake, branding, UAT with real staff, role-based training (admin / office / technician), and hypercare — so the same platform can be duplicated for the next shop.
- Shipped Insightful Care Solutions, a production telepsychiatry site for a New Jersey practice: React + Firebase Hosting, Google Apps Script intake, ChARM Health booking, crisis-resource UX, and owner SEO/ops docs. Live: insightfulcare.solutions.
- Built TaxTacker, a tax-record organizer for freelancers: React web + Expo iOS/Android, Stripe and store IAP entitlements, security rules, and GitHub Actions CI.

FITD — Founder & Engineer

2025 – Present

- Founded a fashion AI product and ran the FDE loop for brands: catalog onboarding (~57 brands / ~16.5k SKUs), admin CRM, Instagram growth automations, and an in-store kiosk concept on top of a production SwiftUI app and Firebase/GCP backend.

City of Elizabeth — Database Engineer Intern

May 2024 – Sep 2024 · Elizabeth, NJ

- Managed MongoDB and Excel document stores to improve a knowledge-sharing network used by 500+ staff.

EDUCATION

Columbia University — B.S., Computer Engineering · Sep 2023 – Present · New York, NY

St. Lawrence University — B.A., Mathematics · Jul 2020 – May 2023 · Canton, NY

James Cook University — Computer Engineering (exchange) · Jun 2022 – Nov 2022 · Townsville, QLD

SKILLS

Delivery: customer-embedded build, UAT, runbooks, last-mile integrations, RBAC, fail-closed releases

Stack: TypeScript, React, Expo / React Native, Fastify, PostgreSQL, Firebase, Azure, Stripe, Swift

AI in the field: Azure OpenAI (guarded assistant), Gemini / Vertex applied features — not model training
