

ZAKIY T. MANIGO

Full-Stack Engineer

+1 (908) 230-6948 · zakiymanigo@gmail.com · [linkedin.com/in/zakiymanigo](https://www.linkedin.com/in/zakiymanigo)

Full-stack engineer who takes a feature from client through API, data, and deploy. Comfortable on web, iOS, serverless, and a real API/Postgres stack — same account, same source of truth, both surfaces.

EXPERIENCE

BariAccess (TREI) — Software Engineer (one of two primary engineers)

Jul 2026 – Present · New York, NY / Remote

- Shipped vertical slices across a TypeScript monorepo: Fastify API, PostgreSQL, worker + outbox, Expo iPhone app, React staff console, and the public/patient site at trei.care. Heaviest surfaces: trellis-web, patient-mobile, staff-web, API, and shared data/application packages.
- Built shared identity across website and iPhone; server-owned Today / Plan / Progress / Aba on the phone; staff dashboard authorized against Postgres row ownership.
- Connected health as a full-stack problem: OAuth, custody tables, worker pulls, staff strip, and phone shelf — not a client-only widget. Staging on Azure Container Apps with Entra, Key Vault, Service Bus, Stripe, Calendly, and Spike.

LaunchPage Studios — Founding Engineer

Oct 2025 – Present · New York, NY / New Jersey

- TaxTacker: one user, one Firestore model, and one billing state on React/Vite web and Expo iOS/Android. Cloud Functions for Stripe Checkout/Portal/webhooks, store IAP entitlements, custom claims, account deletion, and scheduled push.
- Alex Road Service: HTML/CSS/vanilla JS ops platform + Firebase Auth/Firestore/Functions/Storage/Hosting. Server-owned writes, sequential IDs, optimistic concurrency, Stripe payments/refunds, CSP/HSTS, and security-rules tests.
- Insightful Care Solutions: production React + Vite + Tailwind SPA on Firebase Hosting with a Google Apps Script contact backend and ChARM Health booking. Live: insightfulcare.solutions.

FITD — Founder & Engineer

2025 – Present

- Production SwiftUI iOS app (~115 Swift files), Kotlin/Compose Android port, React marketing site, Next.js admin CRM, and Node 20 Cloud Functions (virtual try-on, receipt validation, catalog import, social, AI bots) on Firebase/GCP.

FitGenius — Founding Technical Partner

May 2026 – Sep 2026

- Expo / React Native iOS + Android (65+ screens) with ~64 Cloud Functions, Firestore rules, IAP verification, HealthKit / Health Connect, background GPS, and GitHub Actions CI.

City of Elizabeth — Database Engineer Intern

May 2024 – Sep 2024 · Elizabeth, NJ

- MongoDB and Excel document storage for a 500+ user knowledge-sharing network.

EDUCATION

Columbia University — B.S., Computer Engineering · Sep 2023 – Present · New York, NY

St. Lawrence University — B.A., Mathematics · Jul 2020 – May 2023 · Canton, NY

James Cook University — Computer Engineering (exchange) · Jun 2022 – Nov 2022 · Townsville, QLD

SKILLS

Languages: TypeScript, JavaScript, Swift, Python, SQL, HTML/CSS · some Kotlin, Rust

Clients: React, Expo / React Native, SwiftUI, Vite, Next.js

Backend / data: Fastify, PostgreSQL, Firebase (Auth, Firestore, Functions, Hosting), Cloud Functions, Stripe

Ship: GitHub Actions, Azure Container Apps, EAS, App Store / Play billing paths
