

Zakiy T. Manigo

AI Product Engineer

New York, NY | +1 (908) 230-6948 | zakiymanigo@gmail.com | linkedin.com/in/zakiymanigo

September 21, 2026

Dear Hiring Team:

I am writing to apply for an AI Product Engineer role. I ship model-backed features with constraints: grounding, cost and latency, failure UX, and safety. I apply existing models in production products and do not claim foundation-model training.

At FITD I put Gemini in the product for closet and brand labeling, a stylist grounded on wardrobe and weather, and Vertex virtual try-on behind a Cloud Function proxy so the mobile client never embeds the key. Community bots run with human approval, quotas, moderation, and a kill switch.

At BariAccess the clinic assistant is fail-closed Azure OpenAI: it is allowed to speak approved clinical meaning, not to freelance claims. That is the job I want — applied models in shipped UX, with the failure path designed on purpose.

Thank you for considering my application. I can be reached at (908) 230-6948 or zakiymanigo@gmail.com and look forward to discussing the role.

Sincerely,

Zakiy T. Manigo
