Re: Rillet Consultant (JR104362)

Dear Recruiting Team:

I am writing to apply for the Rillet Consultant role. Armanino's Automation and Application Consulting practice is built on a combination I already work in: finance-adjacent systems, client-site implementation, and software that has to match how an office actually closes its books. I am based in the New York area and can work from the Madison Avenue office on the hybrid schedule described in the posting.

At Alex Road Service I sat with the operator and implemented the path the shop runs: estimates to invoices to Stripe payments and refunds. After go-live I wrote the delivery system around it: intake, user-acceptance testing with real staff, role-based training, and hypercare so the same platform can be configured for the next client. TaxTacker applies the same discipline to records: tax-year workspaces, documents, and exception reports. It is a records organizer, not a tax-filing product, and my accounting evidence is systems implementation rather than public-accounting practice.

At BariAccess I embed with Bariatric Associates on TREI. When clinic workflow disagreed with the first design, we changed identity, consults, membership, scheduling, and payments rather than forcing the client onto a demonstration path. That is the motion I want to bring to Rillet implementations for mid-market clients as the practice scales.

Thank you for considering my application. I can be reached at (908) 230-6948 or zakiymanigo@gmail.com and look forward to discussing the role.

Sincerely,

Zakiy T. Manigo
