EXPERIENCE

BariAccess (TREI)

New York, NY / Remote

Software Engineer (one of two primary engineers)

Jun 2025 – Present

- Embedded with Bariatric Associates to implement TREI, a GLP-1 and metabolic-care platform: patient site (trei.care), Expo iPhone app, React staff console, Fastify API, PostgreSQL, and a worker with a transactional outbox.
- Delivered the clinic path end to end — identity, preparation, consults, membership, staff admission, daily programs, wearable custody, and a fail-closed Azure OpenAI assistant — and revised the product when office workflow did not match the first design.
- Integrated last-mile clinic systems on Azure staging: Entra / External ID, Key Vault, Service Bus, Stripe sandbox, Calendly, and Spike wearable adapters.

- Wrote the post-sale delivery playbook: intake, user-acceptance testing with client staff, role-based training, and hypercare so the platform can be duplicated for the next shop.
- Launched Insightful Care Solutions (insightfulcare.solutions) and TaxTacker, a tax-record organizer on React web and Expo with Stripe entitlements and GitHub Actions.
