EXPERIENCE

BariAccess (TREI)

New York, NY / Remote

Product / Software Engineer (one of two primary engineers)

Jun 2025 – Present

- Built TREI inside a bariatric practice's real onboarding: intakes, remotes, membership, staff admission, and daily program work across trei.care, Expo iPhone, React staff console, Fastify API, and PostgreSQL.
- Encoded first-release decisions as software (Free Basic versus Path A, preparation readiness, patient language rules, Healthspan gated, Path B deferred) and kept public surfaces fail-closed with a scientific / product counterpart rather than acting as a product manager.

FITD

Founder and Product Engineer

2025 – Present

- Defined and shipped the consumer loop (closet, shop, AI stylist grounded on wardrobe and weather, virtual try-on, social feed) and brand operations for approximately 57 brands and 16,500 SKUs on a production SwiftUI app and Firebase / GCP backend.

FitGenius

Founding Technical Partner

LaunchPage Studios

Founding Engineer

Oct 2025 – Present

- Insightful Care: services, insurance, and crisis resources with booking handoff to ChARM Health. Live: insightfulcare.solutions.
