EXPERIENCE

FITD

New York, NY

Founder and AI / Automation Engineer

2025 – Present

- Shipped Gemini 2.0 Flash in product for closet and brand labeling and a stylist grounded on wardrobe and weather; Vertex virtual try-on runs through a Cloud Function proxy so the mobile client never embeds the key.
- Built community bots (Gemini, Imagen, Veo) with human approval, quotas, moderation, and a kill switch.
- Automated brand and growth operations: catalog import for approximately 57 brands and 16,500 SKUs, an Instagram CRM (Flask, SQLite, GPT-4o), and n8n posting workflows.

BariAccess (TREI)

New York, NY / Remote

- Productized Aba, a fail-closed Azure OpenAI assistant (voice and text) on a metabolic-care platform, with patient-language rules and secrets in Key Vault.
- Automated last-mile clinic work with a worker and transactional outbox: wearable custody pulls, scheduling, and Stripe sandbox events on Azure Container Apps.

FitGenius

Founding Technical Partner

May 2026 – Sep 2026

- Applied Gemini on Vertex AI to fitness: catalog-constrained coaching, JSON plans, and food estimates, with GPS, health samples, and photos stripped from model payloads.

Local AI

New York, NY

Product Engineer

2026

- Built an offline Windows desktop client (Tauri 2, React, Rust) for local GGUF models via llama.cpp, including documents and retrieval-augmented generation with no cloud inference from the UI.
