I put models and scheduled jobs behind gates people can live with: grounding, quotas, a human approval step, and a kill switch. I build those applied-model features and job-based automations with a real failure path, across Cloud Functions, n8n, webhooks, and worker jobs. I completed a Columbia B.S. in Computer Engineering through the Combined Plan and I am based in New York / New Jersey.

RELEVANT EXPERIENCE

BariAccess

Livingston, NJ / Hybrid

Software Engineer

June 2025 – Present

- Served as one of two primary engineers and productized fail-closed ABA plus a worker/outbox for wearable pulls, scheduling, and payment events on TREI (trei.care).
- Landed features behind tests, CI, and fail-closed gates so an automation miss has a written recovery path.
- Held ABA to approved clinical meaning through patient-language rules on public and clinic surfaces.
- Automated Spike pulls, Calendly, and Stripe events through outbox jobs so the clinic path runs without a person clicking every step.
- Wired ABA voice and text through one policy path so a spoken question cannot skip the typed safety checks, then asked Realtime to speak only the checked body.
- Stored Azure OpenAI keys in Key Vault and encoded rate limits, 24-hour retention, and medical-claim output checks in code so a model miss cannot invent a clinical claim.

City of Elizabeth

Elizabeth, NJ

Database Engineer Intern

May 2024 – September 2024

- Administered MongoDB and Excel document stores supporting a knowledge-sharing network used by more than 500 municipal staff.
- Automated reporting pipelines and improved data flow across departments so shared records could be reused without a manual handoff.

PROJECTS

FITD AI

Remote

Founder and Engineer

May 2024 – Present

- Shipped labeling, a wardrobe-grounded stylist, a virtual try-on proxy, and moderated community bots on Gemini, Vertex, and GPT-4o behind product gates.
- Ran catalog import, Instagram CRM, and n8n posting workflows with human approval and a kill switch so growth jobs can be stopped without a code freeze.

LaunchPage Studio

Remote

Founding Engineer

October 2025 – Present

- Automated Automotive Operations System payments and intake with Stripe webhooks, scheduled Cloud Functions, and Google Apps Script on the same event path the shop already closes.
- Shipped estimates, invoices, refunds, and role-based access for Automotive Operations System so money events land in the same operating loop.
- Built TaxTracker Pro webhook and scheduled-job automation for tax-year records, documents, and export, with Stripe Checkout, Customer Portal, and store IAP entitlement jobs behind signature verification.

Local AI

Remote

Product Engineer

August 2026 – Present

- Built an offline GGUF desktop client with documents and retrieval-augmented generation so inference stays on the machine.
- Ran local inference via llama.cpp as a child process, with chats stored in SQLite.

FitGenius

Remote

Founding Technical Partner

May 2026 – Present

- Applied Gemini on Vertex AI to fitness with GPS, health samples, and photos stripped from model payloads before the request leaves the device path.
- Scheduled Cloud Functions and IAP verification on the same Firebase project so entitlements and model jobs share one environment.

EDUCATION

Columbia University

New York, NY

Bachelor of Science in Computer Engineering

May 2025

Fu Foundation Combined Plan 3+2

Computer Architecture, Databases, AI, Embedded Systems, and UI Design

St. Lawrence University

Canton, NY

Bachelor of Arts in Mathematics

May 2023

Dean's List, Spring 2022

Calculus, Linear Algebra, Differential Equations, and Group Theory

James Cook University

Townsville, QLD, Australia

Undergraduate Exchange

Fall 2022

Statistical Data Mining, Probability and Stochastic Processes, Game Design, and Human Rights

SKILLS/INTERESTS

Skills: Azure OpenAI, Gemini / Vertex AI, GPT-4o, llama.cpp / GGUF, n8n, Cloud Functions, GitHub Actions, Google Apps Script, worker / outbox jobs, TypeScript, Python, Swift, React, Firebase / GCP, Azure

Interests: calisthenics, gym, running, basketball, golf, snowboarding, hiking, skeet, pop/R&B production, cooking, journaling, travel, poker

Community: worship tech, Siloam-Hope First Presbyterian; NAACP Elizabeth Branch; Supervising Tutor, Central Presbyterian Church
