I work on the platform layer that keeps a product safe to run: identity, secrets, CI/CD, runbooks, and generative AI with a written path when it is wrong. In production that is Azure, Git, and CI/CD, plus Firebase pipelines and security-rules tests on the client systems I ship. I completed a Columbia B.S. in Computer Engineering through the Combined Plan and I am based in New York / New Jersey.

RELEVANT EXPERIENCE

BariAccess Livingston, NJ / Hybrid
Software Engineer June 2025 – Present

- Served as one of two primary engineers operating Azure staging for TREI (trei.care), including Container Apps, Entra, Key Vault, and Service Bus.
- Handled secrets on a least-privilege path with runbooks for failure, and kept keys for ABA, a medical AI assistant and companion being built for TREI in BariAccess, in Key Vault.
- Ran CI-oriented releases across API, PostgreSQL, worker/outbox, staff console, and iPhone, including rollback notes in the same habit.
- Held public surfaces fail-closed so a model miss has a written recovery path instead of an open clinic screen.

City of Elizabeth Elizabeth, NJ
Database Engineer Intern May 2024 – September 2024

- Administered MongoDB and Excel document stores for a knowledge-sharing network used by more than 500 municipal staff.
- Automated reporting pipelines and improved data flow across departments so shared records could be reused without a manual handoff.

PROJECTS

LaunchPage Studio Remote
Founding Engineer October 2025 – Present

- Built pipelines and security-rules tests for Automotive Operations System covering estimates, invoices, Checkout, webhooks, and refunds.
- Deployed Automotive Operations System on Firebase Hosting with GitHub Actions and role-based access across admin, office, and technician.
- Ran scheduled Cloud Functions, Firestore and Storage rules, App Check, Crashlytics, and a confirm-gated rules deploy for TaxTracker Pro tax-year records, documents, and export.

FITD AI Remote
Founder and Engineer May 2024 – Present

- Put Gemini and Vertex AI behind a Cloud Function proxy with keys on the server rather than in the client.
- Ran community bots with quotas, moderation, and a kill switch on Firebase / GCP so generation can be stopped without a code freeze.

Local AI Remote
Product Engineer August 2026 – Present

- Built an offline Windows desktop client for local models, documents, and retrieval so inference never leaves the machine.
- Pinned llama.cpp as a child process and shipped installer-tested Windows releases.

FitGenius Remote
Founding Technical Partner May 2026 – Present

- Shipped Cloud Functions, Firestore rules, IAP verification, and GitHub Actions CI for a consumer fitness app.
- Ran rules tests and function tests on the same pipeline as the mobile client.

EDUCATION

Columbia University New York, NY
Bachelor of Science in Computer Engineering May 2025

Fu Foundation Combined Plan 3+2

Computer Architecture, Databases, AI, Embedded Systems, and UI Design

St. Lawrence University Canton, NY
Bachelor of Arts in Mathematics May 2023

Dean's List, Spring 2022

Calculus, Linear Algebra, Differential Equations, and Group Theory

James Cook University Townsville, QLD, Australia
Undergraduate Exchange Fall 2022

Statistical Data Mining, Probability and Stochastic Processes, Game Design, and Human Rights

SKILLS/INTERESTS

Skills: Azure (Container Apps, Entra, Key Vault, Service Bus), Firebase / GCP, GitHub Actions, PostgreSQL, Firestore, MongoDB, SQL, TypeScript / Node.js, Python, Azure OpenAI, Gemini / Vertex AI, kill switches

Interests: calisthenics, gym, running, basketball, golf, snowboarding, hiking, skeet, pop/R&B production, cooking, journaling, travel, poker

Community: Siloam-Hope First Presbyterian; NAACP Elizabeth Branch; Supervising Tutor, Central Presbyterian Church
