September 21, 2026

Dear Hiring Team:

I am writing to apply for a Full-Stack Engineer role. I take a feature from client through API, data, and deploy, on web, iOS, serverless, and API / Postgres stacks, with one account and one source of truth across surfaces.

At BariAccess I ship vertical slices across a TypeScript monorepo: Fastify API, PostgreSQL, worker and outbox, Expo iPhone app, React staff console, and the public patient site. Shared identity, server-owned Today / Plan / Progress on the phone, and staff views authorized against Postgres row ownership are one product.

The same pattern shows up at LaunchPage Studio: TaxTracker Pro (React web and Expo iOS / Android, Stripe and store IAP, CI) and Automotive Operations System, plus clinic sites that have to stay live after the first demonstration.

I am looking for a seat where the work is a vertical slice. Thank you for considering my application. I can be reached at (908) 230-6948 or zakiymanigo@gmail.com.

Sincerely,

Zakiy T. Manigo
