

ZAKIY T. MANIGO

Product Engineer

+1 (908) 230-6948 · zakiymanigo@gmail.com · [linkedin.com/in/zakiymanigo](https://www.linkedin.com/in/zakiymanigo)

Product engineer who sits with users, shapes the workflow, and ships the smallest honest version. Encodes product decisions as gates — what is visible, what is deferred, and what the software is not allowed to invent.

EXPERIENCE

BariAccess (TREI) — Product / Software Engineer (one of two primary engineers)

Jul 2026 – Present · New York, NY / Remote

- Built TREI inside a bariatric practice's real onboarding: intakes, remotes, membership, staff admission, and daily program work. Public patient site at trei.care, Expo iPhone app, React staff console, Fastify API, PostgreSQL.
- Encoded first-release product decisions as software: Free Basic vs Path A, preparation readiness, handover, staff operating view, patient language rules, Healthspan hidden until destination release, Path B deferred, Garmin display-only.
- Kept public surfaces fail-closed and canon-disciplined — implement approved clinical meaning, do not freelance claims. Partnered with a scientific/product counterpart rather than acting as a PM.

FITD — Founder & Product Engineer

2025 – Present

- Defined and shipped the consumer loop: closet, shop, AI stylist, virtual try-on, social feed, and brand toolkit. Constrained the stylist to wardrobe + weather so it is useful, not a generic chatbot.
- Ran brand-facing product ops: catalog schema (~57 brands / ~16.5k SKUs), admin CRM, internship/lead funnels, and prompt packs. Production SwiftUI app plus Firebase/GCP backend.

FitGenius — Founding Technical Partner

May 2026 – Sep 2026

- Owned product, mobile, cloud, QA packets, and founder enablement for a consumer fitness app: training plans, food estimate, daily coaching, HealthKit/GPS, and legal/compliance suite. Pre-launch; store submit still open.
- Hybrid product: deterministic engines (progressive overload, pace, Fit Score) plus Gemini features under a medical-not-clinician system prompt.

LaunchPage Studios — Founding Engineer

Oct 2025 – Present · New York, NY / New Jersey

- Insightful Care: explained services, insurance, and crisis resources, then sent patients to ChARM Health to book — product that matches how a virtual psych practice actually intakes. Live: insightfulcare.solutions.
- Alex Road Service: modeled how a 24/7 truck shop runs (office vs technician permissions, estimates → invoices → Stripe) and productized the install for the next shop.
- TaxTacker: tax-year workspaces, missing-item reports, and ZIP export for freelancers — an organizer, not a filing engine.

City of Elizabeth — Database Engineer Intern

May 2024 – Sep 2024 · Elizabeth, NJ

- Improved document storage and knowledge-sharing tools used by 500+ staff.

EDUCATION

Columbia University — B.S., Computer Engineering · Sep 2023 – Present · New York, NY

St. Lawrence University — B.A., Mathematics · Jul 2020 – May 2023 · Canton, NY

James Cook University — Computer Engineering (exchange) · Jun 2022 – Nov 2022 · Townsville, QLD

SKILLS

Product: workflow design, copy/logic together, release gating, founder/clinic enablement

Build: TypeScript, React, Expo, SwiftUI, Fastify, PostgreSQL, Firebase, Stripe

Applied AI: Gemini, Vertex virtual try-on, Azure OpenAI assistant — grounded in inventory, policy, and UX for uncertainty
